*Human milk banking:
Brazilian model*

The Latin America - Iberoamerica, Caribbean and Africa Human Milk Bank Network

genesis, evolution and prospects

International Cooperation

Human Milk Bank: Definition

Specialized service responsible for the screening, collection, processing, storage, control of quality and distribution of donated human milk

AND

Responsible for the promotion, protection and support of breastfeeding

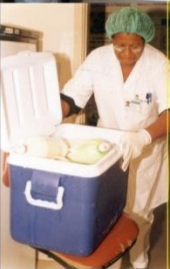

OBJECTIVES

- Promote, protect and support breastfeeding
- Collect and distribute HM with certified quality
- Contribute for infant mortality reduction
- Add efforts to the National Pact for Mother/Neonate Mortality

Espaço de integração onde a adolescente, a mãe de meia-idade e a imigrante compartilham diferenças, doam e recebem. Ao fundo, o apoio profissional.

... this is Juliana when she was 15 days old

... this is Juliana today

*Juliana was born
weighing 1250g*

*MariaPaula
donated milk to Juliana*

*Thus, Philip became
Juliana's "milk brother"*

Doar leite materno é multiplicar vida com esperança.

É somar saúde com solidariedade. É dividir o alimento mais completo que existe. É diminuir a mortalidade infantil. É igual ao amor: quanto mais a gente doa, mais a gente tem.

Maria Paula amamentou seu filho Felipe e, também, doou leite materno, ajudando a Júlia Victória e muitas outras crianças a crescerem com mais saúde.

Informe-se no banco de leite da sua cidade: _____
